### PROFILE

Data Analyst and Monitoring & Evaluation (M&E) professional with 3+ years of experience in health-sector data management, reporting, and visualization within USAID-funded projects. Skilled in SQL, Python, Power BI, and Excel with a strong track record of improving data quality, streamlining reporting processes, and enabling evidence-based decision-making. Adept at stakeholder engagement, capacity building, and ensuring data integrity across multiple facilities and platforms.

### WORK EXPERIENCE

#### Achieving Health Nigeria Initiative (AHNi)

MAY 2025 - PRESENT

##### Data Assistant

- Coordinated monitoring and evaluation activities across supported facilities, improving data completeness and accuracy.
- Validated and analyzed facility data daily, reducing inconsistencies by implementing timely corrections.
- Created Excel pivot charts and dashboards to track performance, enabling data-driven decision-making by management.
- Supported medical records officers and frontline staff in maintaining data integrity and reporting compliance.

#### Achieving Health Nigeria Initiative (AHNi)

2022 - 2025

##### Data Entry Clerk

- Managed electronic medical records on LAMISPlus and ensured accurate entry of client-level data.
- Conducted deep-dive data analysis and built Power BI dashboards, providing insights that informed HIV program strategies.
- Led monthly and quarterly data validation exercises with >95% reporting compliance.
- Produced periodic reports for DHIS, enabling accurate state and national-level health reporting.

#### Holy Family Catholic Hospital, Ikom

2021 - 2022

##### Volunteer - Data Clerk

- Ensured data accuracy by identifying and correcting gaps/outliers within 2 hours.
- Supported facility staff with run chart updates, increasing data utilization in program planning.
- Participated in daily and weekly data review meetings to reconcile facility and community reports.
